

WATER COLLECTION POINTS

Due to the reduction of supply from the Churchill dam, Bay water users will start to experience intermittent water supply. However, to compensate, the Metro will provide water supply through temporary measures with standpipe collection points, rainwater tanks, and water tankers.

10

Communal water collection sites

will be activated to operate 24 hours a day. This arrangement may start from **Saturday, 25 June 2022** and is estimated to persist for a **minimum of seven days**.
